The Flag given is = heTfl g as

iicpCTo{7F4NRP051N5_16_35P3X51N3_V091B0AE}2

It can be seen the if T moves 1st , h moves 2nd, and then e moves third, it will form a meaningful word The

So, a python code making these needs to be written

```
main.py +
1 Flag = "heTfl g as iicpCTo{7F4NRP051N5_16_35P3X51N3_V091B0AE}2"
2 for i in range(0, len(Flag), 3): # starts at 0, stops at the length of the Flag & jumps forward to 3 in every loop
3     print(Flag[i+2], Flag[i], Flag[i+1], sep='', end='')
4     # Flag[i+2] grabs 3rd character
5     # Flag[i] grabs the 1st character
6     # Flag[i+1] grabs the 2nd character
7     # end = "" keeps printing on the same line

Ln: 1, Col: 9 (54 selected)
